

# OPEN ACCESS TO FEDERALLY-FUNDED RESEARCH

NAGPS Legislative  
Concerns Committee

Increasing Innovation and Improving Education

## We urge you to support and co-sponsor legislation that:

- Provides the public with **free and immediate online access** of taxpayer-funded research articles.

## OPEN ACCESS: A Win for American Students, Taxpayers, and Small Business

- **Small Business:** Removes the cost barrier that prevents small businesses from incorporating the latest research into their innovation.
- **Students:** Provides access to cutting-edge research and reduces the cost burden for continuing education.
- **Citizens:** Maximizes taxpayers' return on investment in publicly funded research and provides every taxpayer with access to research they have paid for.
- **Accountable Government:** Allows transparent review of how federal dollars are used

## Proven Track Record of Success: The NIH Public Access Program

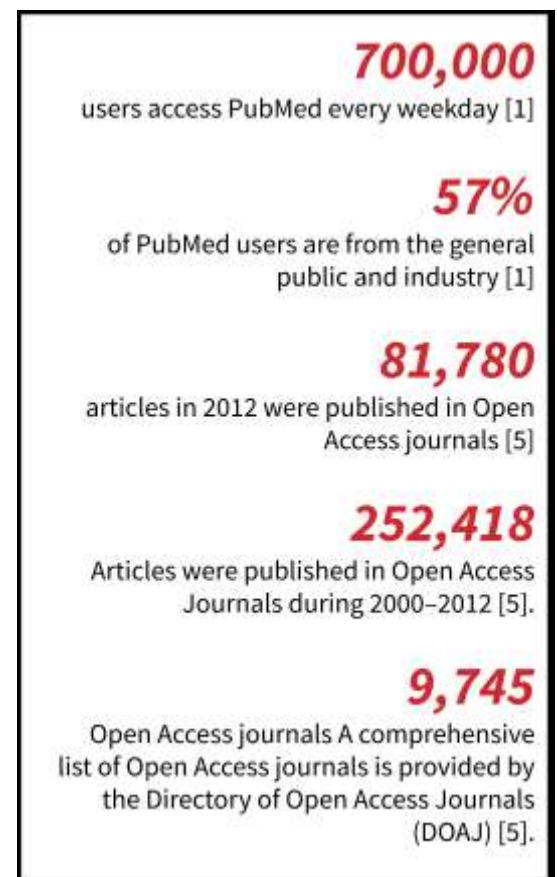

The NIH public access policy currently requires peer-reviewed papers developed from NIH-funded projects to be submitted to NIH's public PubMed Central (PMC) database within one year after publication [1].

Every weekday, more than 700,000 users access PMC. The NIH estimates that only 25% of these users are from universities, 40% are from the general public, and 17% are from industry [1].

## Support from Publishers

At least 50 major publishers, including the Nature Publishing Group and the American Institute of Physics, have pledged to support access models that maximize "dissemination of and access to the content" they publish [2].

Growth in the medical journal market -- the one most affected by the NIH policy -- is forecast to be 4.0% annually from 2015-2017 [3].

# IMPROVING EDUCATION RESOURCES

---

## Support Affordable College Textbooks

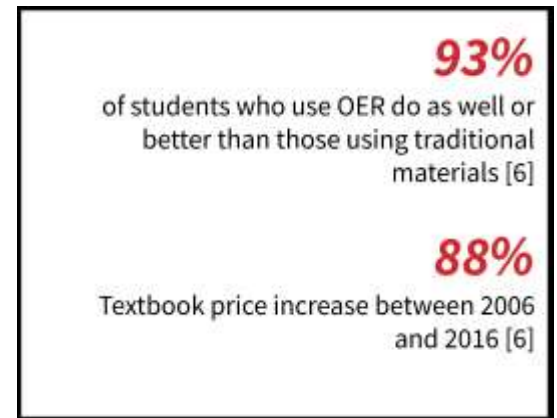

### We urge you to support and co-sponsor legislation that:

- Creates and expands the use of **Open Educational Resources (OER)** in higher education.
- Makes higher education more affordable by **reducing the cost of college textbooks**.

### OPEN Educational Resources (OER) are Fiscally Responsible

- The rising cost of college textbooks places an unnecessary burden on all students. The Government Accountability Office (GAO) found that college textbook prices increased 88% between 2006 and 2016 [6].
- Considering recent technological advancements, textbook prices should be decreasing, not increasing.
- Open Educational Resources (OER) are digital textbooks and other materials licensed for free.
- Expanding the creation and use of OER can reduce the burden of textbook costs and make higher education more affordable
