July 17, 2019

The Honorable James Lankford  
Chair  
Senate Committee on Homeland Security and  
Governmental Affairs  
340 Dirksen Senate Office Building  
Washington, DC 20510

The Honorable Kyrsten Sinema  
Ranking Member  
Senate Committee on Homeland Security and  
Governmental Affairs  
442 Hart Senate Office Building  
Washington, DC 20510

Dear Chairman Lankford and Ranking Member Sinema,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

Sincerely,

Kaylynne M. Glover

Washington, DC 20510

Dear Senator Carper,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

Sincerely,

Kaylynne M. Glover

July 17, 2019

The Honorable Cory Gardner  
354 Russell Senate Office Building  
Washington, DC 20510

Dear Senator Gardner,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

**We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas.** If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

The Honorable Amy Klobuchar
425 Dirksen Senate Office Building
Washington, DC 20510

Dear Senator Klobuchar,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

Dear Senator Portman,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

**We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas.** If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

Sincerely,

Kaylynne M. Glover

In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.

July 17, 2019

The Honorable Debbie Stabenow
731 Hart Senate Office Building
Washington, DC 20510

Dear Senator Stabenow,

We at the National Association of Graduate-Professional Students are duty-bound to voice the concerns and needs of graduate and professional students nationwide as we officially represent students enrolled at universities across twenty-two states and advocate for the more than 2 million graduate-professional students nationwide. We are writing on behalf of our students, of academic programs, and of the future of American scientific progress and workforce concerning S. 386 and HR. 1044, the Fairness for High-Skilled Immigrants Act.

We appreciate the effort of this legislation to reform employment-based (EB) Lawful Permanent Residency (LPR) and to clear the backlog of applicants for green cards. However, without removing overall caps, this legislation would increase wait times for many applicants, particularly those of newly-graduated masters and doctoral students who have earned their degrees in the United States.

We believe that these students should be prioritized in receiving green cards and H1-B visas, as they have lived and worked in the United States for several years. In addition to bringing valued and diverse perspectives, they are important for our scientific advancement, economic growth and global competitiveness: international students have founded nearly 25% of all billion-dollar startups and, in 2018, contributed $39 billion dollars to the economy.

We strongly encourage you to support an amendment to S. 386/HR. 1044 that would prioritize international students, regardless of their country-of-origin, in applications for green cards and H1-B visas. If we can be a resource to you or your staff as you consider this and other issues related to graduate education, please do not hesitate to contact us.
